Resolution to Prevent and End Homelessness

Whereas an estimated 14,000 Minnesotans are homeless on any given night and over 11,600 school children lack stable housing; and

Whereas expanding housing options and economic opportunity is the most humane and cost-effective approach to addressing homelessness; and

Whereas housing stability promotes better health, education, and economic outcomes;

Be it resolved that the Legislature and the Governor enact policies and increase resources to prevent homelessness, promote stable housing, and expand economic opportunity.
